Rise of the Black Lanterns is much like The Black Lantern Corps books: pure tie-in filler that further expands on the awesome Blackest Night event. If you don't want to read the filler, you don't have to; it isn't a necessary read to understand the main event but it is excellent none the less. This volume mostly focuses on members of the Justice League who get conscripted into the Black Lantern Corps based on their previous deaths and resurrections (Green Arrow and Superboy) as well as some characters who don't fit into the main arc like Catwoman and The Question. The Green Arrow and Catwoman arcs are the stand outs for me as the latter is once again faced with her arch-enemy Black Mask and Green Arrow is forced to watch his Black Lantern self attack and torture his loved ones. Overall a great collection although some of the C-List characters who show up aren't the most interesting.
